SUMMARY

Full Stack Developer with hands-on experience building clean, scalable web applications. Recently completed an in-depth full-stack development program, mastering both frontend and backend tools to build secure, data-driven software. Dedicated to writing readable code and quick to pick up new frameworks and technologies.

TECHNICAL & PROFESSIONAL SKILLS

- Frontend Development: HTML5, CSS3, JavaScript (ES6+), React
 - Backend & Databases: Node with Express.js and PostgreSQL
 - Programming Languages: Python (ML Modeling), Java(Beginner)
 - Core Competencies: Problem Solving, Critical Thinking, Team-Oriented Communication
-

PROFESSIONAL EXPERIENCE

Full Stack Web Development 2025 – Present

- Built responsive full-stack web applications from scratch using HTML, CSS, and JavaScript.
- Created secure RESTful APIs with Node.js and Express, handling routing and custom middleware.
- Connected backend APIs with frontend components to ensure smooth, real-time data flow.
- Designed and managed relational databases using SQL to handle data safely and efficiently.
- Wrote clean, modular code and managed version control using Git.

ADVI Group of Companies Jun 2025 – Aug 2025

- Gained Experience In Python to execute real-world computational problem-solving projects.
 - Developed, trained, and evaluated multiple Machine Learning models using Python-frameworks.
-

PROJECTS

FLAMS Bridge – Web-Based Application | Hackathon at KPRIET

Developed a "Farmer Live Agri Marketing System" platform to connect agricultural producers.

Map Navigator | Python & Streamlit

Built a mock Google Map application tracking exact junction points and distance calculations.

Web OS – Interactive UI | Only Frontend

Build an frontend focused Browser based desktop environment that simulates an OS.

EDUCATION

B.E - Computer Science And Engineering (8.57) | AVSEC

2023 - Present

Higher Secondary School (83.34%)

2021 - 2023
